Profile

Data Science undergraduate hands-on experience in data cleaning, exploratory data analysis (EDA), and feature engineering with a problem-solving mindset. Proficient in writing complex SQL queries and working with relational databases to support data-driven decision-making. Skilled in data engineering workflows including ETL pipelines, connecting backend databases with frontend applications, and building interactive dashboards for clear data visualization. Built end-to-end ML pipelines from preprocessing to serialization.

Education

FAST National University of Computer & Emerging Sciences (FAST-NUCES), Islamabad
BS Data Science, 2023 – 2027

Technical Skills

Programming & Data Science: Python, SQL, C++, C#; Pandas, NumPy, Scikit-learn, EDA, Feature Engineering, Supervised Learning, Clustering, Model Evaluation

Database & Data Engineering: MySQL, SQL (Joins, Views, Stored Procedures, Triggers), ETL Pipelines, Star Schema, OLAP; Windows Forms, CRUD, Database Design, Input Validation

Visualization & Tools: Tableau, Matplotlib, Seaborn, Jupyter, Git, VS Code

Soft Skills: Communication, Teamwork, Problem-Solving, Adaptability, Time Management, Attention to Detail

Projects

House Price Prediction: End-to-End Regression Pipeline | *Python, Pandas, Scikit-learn, Joblib*

- Executed complete end-to-end ML workflow: data cleaning, outlier handling, EDA, and feature engineering on 81-feature housing dataset
- Trained and tuned multiple models including Random Forest and XGBoost with robust evaluation metrics
- Serialized pipeline using joblib for reproducibility, production-ready predictive system

Retail Data Warehouse & ETL Pipeline (Walmart Simulation) | *Python, MySQL, SQL, Pandas*

- Architected ETL pipeline integrating transactional data into star schema (fact & dimension tables)
- Wrote complex analytical SQL queries (aggregations, window functions) for BI reporting and data validation

Customer Behavior Analysis & Predictive Modeling | *Python, Pandas, Scikit-learn*

- Deep EDA and feature engineering on retail electronics dataset to uncover purchasing patterns
- Built regression, decision tree, and clustering models translating data into actionable business strategies

Global Disaster Resilience: Tableau Dashboard | *Python, Pandas, Tableau*

- Integrated EM-DAT, World Bank, and UNDP datasets into unified country-year panel for cross-domain analysis
- Engineered resilience metrics; designed interactive Tableau dashboards with geospatial and trend analysis

Event Management System: Database-Backend Integration | *MySQL, SQL, C#, Windows Forms*

- Designed normalized schema with views, stored procedures, and triggers for business logic enforcement
- Built Windows Forms frontend connected to MySQL backend; handled data via SQL queries with input validation

E-commerce Desktop: Full-Stack Data Handling | *C#, MySQL, SQL, Windows Forms*

- Complete desktop system with authentication, product browsing, search functionality, cart, and checkout logic
- Integrated MySQL backend with input validation; SQL-based CRUD operations powering dynamic frontend

Certifications

IBM Data Science Professional Certificate

Supervised Machine Learning – DeepLearning.AI

Microsoft Office Specialist: Word Associate Office 2019 & PowerPoint Associate Office 2019

Achievements

Participant, Data Visualization Competition – NaSCon 2025

Awarded 2-year college scholarship for exceptional performance in Matriculation (2021–2023)

Relevant Coursework

Database Systems, Data Warehousing & Business Intelligence, Data Analysis & Visualization, Data Structures & Algorithms, Introduction to Data Science
